RE: Evigia Systems, Inc.
FCC ID: XND-EBB-1

The following is in response to the comments made on the above referenced application.

1) I cannot find any statements concerning 15.240(f). Is this mentioned somewhere in a different user's manual or how does the grantee abide by this rule. Maybe an attestation stating how they comply with this.

The transponders included in this application always operate within the rules of FCC Part 15.231. Thus, it is not necessary to notify the FCC OET about use of these transponders in specific locations as prescribed by FCC 15.240. The client is pursuing 15.240 certification of these transponders for marketing reasons.

For a receiver (reader) device associated with this type of product and professionally installed, notification statements as outlined in FCC 15.240 will be provided.
